1 Cryptography and data security
Dorothy Elizabeth Robling Denning
January 1982 Book
Publisher: Addison-Wesley Longman Publishing Co., Inc.
Full text available: pdf(19.47 MB) Additional Information: full citation, abstract, references, cited by, index terms

From the Preface (See Front Matter for full Preface)

Electronic computers have evolved from exiguous experimental enterprises in the 1940s to prolific practical data processing systems in the 1980s. As we have come to rely on these systems to process and store data, we have also come to wonder about their ability to protect valuable data.

Data security is the science and study of methods of protecting data in computer and communication systems from unauthorized disclosure ...

2 On interdomain routing security and pretty secure BGP (psBGP)
P.C. van Oorschot, Tao Wan, Evangelos Kranakis
July 2007 **ACM Transactions on Information and System Security (TISSEC)**, Volume 10 Issue 3
Publisher: ACM Press
Full text available: pdf(469.49 KB) Additional Information: full citation, abstract, references, index terms

It is well known that the Border Gateway Protocol (BGP), the IETF standard interdomain routing protocol, is vulnerable to a variety of attacks, and that a single misconfigured or malicious BGP speaker could result in large-scale service disruption. In this paper, we present *Pretty Secure BGP (psBGP)*---a proposal for securing BGP, including an architectural overview, design details for significant aspects, and preliminary security and operational analysis. psBGP differs from other secur ...

3 Fine-grained control of security capabilities
Dan Boneh, Xuhua Ding, Gene Tsudik
February 2004 **ACM Transactions on Internet Technology (TOIT)**, Volume 4 Issue 1

Publisher: ACM Press

Full text available: pdf(128.09 KB) Additional Information: full citation, abstract, references, citings, index terms

We present a new approach for fine-grained control over users' security privileges (fast revocation of credentials) centered around the concept of an on-line semi-trusted mediator (SEM). The use of a SEM in conjunction with a simple threshold variant of the RSA cryptosystem (mediated RSA) offers a number of practical advantages over current revocation techniques. The benefits include simplified validation of digital signatures, efficient certificate revocation for legacy systems and fast revocat ...

4 Session M9: digital rights and marketing: Digital rights management using a mobile phone

Imad M. Abbadi, Chris J. Mitchell

August 2007 **Proceedings of the ninth international conference on Electronic commerce ICEC '07**

Publisher: ACM Press

Full text available: pdf(497.09 KB) Additional Information: full citation, abstract, references, index terms

This paper focuses on the problem of preventing illegal copying of digital assets without jeopardising the right of legitimate licence holders to transfer content between their own devices, which make up a domain. Our novel idea involves the use of a domain-specific mobile phone and the mobile phone network operator to authenticate the domain owner before devices can join a domain. This binds devices in a domain to a single owner, that, in turn, enables the binding of domain licences to the d ...

6 General storage protection techniques: Securing distributed storage: challenges, techniques, and systems

Vishal Kher, Yongdae Kim

November 2005 **Proceedings of the 2005 ACM workshop on Storage security and survivability StorageSS '05**

Publisher: ACM Press

Full text available: pdf(294.61 KB) Additional Information: full citation, abstract, references, index terms

The rapid increase of sensitive data and the growing number of government regulations that require longterm data retention and protection have forced enterprises to pay serious attention to storage security. In this paper, we discuss important security issues related to storage and present a comprehensive survey of the security services provided by the existing storage systems. We cover a broad range of the storage security literature, present a critical review of the existing solutions, compare ...

7 Access management for distributed systems: Peer-to-peer access control architecture using trusted computing technology

Ravi Sandhu, Xinwen Zhang

June 2005 **Proceedings of the tenth ACM symposium on Access control models and technologies SACMAT '05**

Publisher: ACM Press

Full text available: pdf(215.48 KB) Additional Information: full citation, abstract, references, citings, index terms, review

It has been recognized for some time that software alone does not provide an adequate foundation for building a high-assurance trusted platform. The emergence of industry-standard trusted computing technologies promises a revolution in this respect by providing roots of trust upon which secure applications can be developed. These technologies offer a particularly attractive platform for security in peer-to-peer environments. In this paper we propose a trusted computing architecture to enforce ac ...

8 Trustworthy 100-year digital objects: Evidence after every witness is dead

Henry M. Gladney

July 2004 **ACM Transactions on Information Systems (TOIS)**, Volume 22 Issue 3

Publisher: ACM Press

Full text available: pdf(1.24 MB) Additional Information: full citation, abstract, references, citings, index terms

In ancient times, wax seals impressed with signet rings were affixed to documents as evidence of their authenticity. A digital counterpart is a message authentication code fixed firmly to each important document. If a digital object is sealed together with its own audit trail, each user can examine this evidence to decide whether to trust the content---no matter how distant this user is in time, space, and social affiliation from the document's source.We propose an architecture and design that a ...

9 Secure sessions for Web services

Karthikeyan Bhargavan, Ricardo Corin, Cédric Fournet, Andrew D. Gordon

May 2007 **ACM Transactions on Information and System Security (TISSEC)**, Volume 10 Issue 2

Publisher: ACM Press

Full text available: pdf(579.98 KB) Additional Information: full citation, abstract, references, index terms

We address the problem of securing sequences of SOAP messages exchanged between web services and their clients. The WS-Security standard defines basic mechanisms to secure SOAP traffic, one message at a time. For typical web services, however, using WS-Security independently for each message is rather inefficient; moreover, it is often important to secure the integrity of a whole session, as well as each message. To these ends, recent specifications provide further SOAP-level mechanisms. WS-S ...

10 Practical byzantine fault tolerance and proactive recovery

Miguel Castro, Barbara Liskov

November 2002 **ACM Transactions on Computer Systems (TOCS)**, Volume 20 Issue 4

Publisher: ACM Press

Full text available: pdf(1.63 MB) Additional Information: full citation, abstract, references, citings, index terms, review

Our growing reliance on online services accessible on the Internet demands highly available systems that provide correct service without interruptions. Software bugs, operator mistakes, and malicious attacks are a major cause of service interruptions and they can cause arbitrary behavior, that is, Byzantine faults. This article describes a new replication algorithm, BFT, that can be used to build highly available systems that tolerate Byzantine faults. BFT can be used in practice to implement re ...

12 Strong password-only authenticated key exchange

David P. Jablon

October 1996 **ACM SIGCOMM Computer Communication Review**, Volume 26 Issue 5

Publisher: ACM Press

Full text available: pdf(1.52 MB) Additional Information: full citation, abstract, citings, index terms

A new simple password exponential key exchange method (SPEKE) is described. It belongs to an exclusive class of methods which provide authentication and key establishment over an insecure channel using only a small password, without risk of offline dictionary attack. SPEKE and the closely-related Diffie-Hellman Encrypted Key Exchange (DH-EKE) are examined in light of both known and new attacks, along with sufficient preventive constraints. Although SPEKE and DH-EKE are similar, the constraints a ...

13 Secure communications between bandwidth brokers

Bu-Sung Lee, Wing-Keong Woo, Chai-Kiat Yeo, Teck-Meng Lim, Bee-Hwa Lim, Yuxiong He, Jie Song

January 2004 **ACM SIGOPS Operating Systems Review**, Volume 38 Issue 1

Publisher: ACM Press

Full text available: pdf(922.33 KB) Additional Information: full citation, abstract, references

In the Differentiated Services (DiffServ) architecture, each domain has a Bandwidth Broker to provide the resources management, primarily bandwidth reservation. In a multi-domain environment, Simple Inter-domain Bandwidth Broker Signaling (SIBBS) protocol is proposed for the inter-domain communication protocol proposed for bandwidth broker communication. Since the information exchanged between BBs are sensitive in sense of Service Level Agreement (SLA), the communications between the inter-domai ...

15 Mobility support and location awareness: An approach to enhance inter-provider roaming through secret sharing and its application to WLANs
Ulrike Meyer, Jared Cordasco, Susanne Wetzel
September 2005 **Proceedings of the 3rd ACM international workshop on Wireless mobile applications and services on WLAN hotspots WMASH '05**
Publisher: ACM Press
Full text available: pdf(278.20 KB) Additional Information: full citation, abstract, references, index terms

In this paper, we show how secret sharing can be used to address a number of shortcomings in state-of-the-art public-key-based inter-provider roaming. In particular, the new concept does not require costly operations for certificate validation by the mobile device. It furthermore eliminates the need for a secure channel between providers upon roaming. We demonstrate the new approach by introducing a new protocol, EAP-TLS-KS, for roaming between 802.11i-protected WLANs. In addition, we show that ...

16 Certificate-based authorization policy in a PKI environment
Mary R. Thompson, Abdelilah Essiari, Srilekha Mudumbai
November 2003 **ACM Transactions on Information and System Security (TISSEC)**, Volume 6 Issue 4
Publisher: ACM Press
Full text available: pdf(233.63 KB) Additional Information: full citation, abstract, references, citings, index terms

The major emphasis of public key infrastructure has been to provide a cryptographically secure means of authenticating identities. However, procedures for authorizing the holders of these identities to perform specific actions still need additional research and development. While there are a number of proposed standards for authorization structures and protocols such as KeyNote, SPKI, and SAML based on X.509 or other key-based identities, none have been widely adopted. As part of an effort to us ...

17 Secure group management: Secure long term communities in ad hoc networks
Nicolas Prigent, Christophe Bidan, Jean-Pierre Andreaux, Olivier Heen
October 2003 **Proceedings of the 1st ACM workshop on Security of ad hoc and sensor networks SASN '03**
Publisher: ACM Press
Full text available: pdf(156.78 KB) Additional Information: full citation, abstract, references

Until recently, ad hoc networks were mainly used for military and security-sensitive applications. Nowadays, they could also be used in SOHO (Small Office / Home Office) or home networks. In such networks, devices are linked by long term relations. To ensure their security, it is necessary to define precisely which devices belong to a given network and are consequently inside the security perimeter. The chosen mechanisms need to be easy to use, because the users of SOHO and home networks are nei ...

Keywords: ad hoc networks security, home network security, secure long term community

18 Secure group management: Secure multicast groups on ad hoc networks

T. Kaya, G. Lin, G. Noubir, A. Yilmaz

October 2003 **Proceedings of the 1st ACM workshop on Security of ad hoc and sensor networks SASN '03**

Publisher: ACM Press

Full text available: pdf(212.24 KB) Additional Information: full citation, abstract, references, citings, index terms

In this paper we address the problem of secure multicast of data streams over a multihop wireless ad hoc network. We propose a dynamic multicast group management protocol that aims at solving problems that are specific to ad hoc networks such as mobility, unreliable links, and cost of multihop communication. The main idea is to have group members actively participate to the security of the multicast group, therefore reducing the communication and computation load on the source. Since the group s ...

19 Link and channel measurement: A simple mechanism for capturing and replaying wireless channels

Glenn Judd, Peter Steenkiste

August 2005 **Proceeding of the 2005 ACM SIGCOMM workshop on Experimental approaches to wireless network design and analysis E-WIND '05**

Publisher: ACM Press

Full text available: pdf(6.06 MB) Additional Information: full citation, abstract, references, index terms

Physical layer wireless network emulation has the potential to be a powerful experimental tool. An important challenge in physical emulation, and traditional simulation, is to accurately model the wireless channel. In this paper we examine the possibility of using on-card signal strength measurements to capture wireless channel traces. A key advantage of this approach is the simplicity and ubiquity with which these measurements can be obtained since virtually all wireless devices provide the req ...

Publisher: ACM Press

Full text available: pdf(503.77 KB) Additional Information: full citation, abstract, references, index terms

Mobility, usability and security are major requirements for any Ad Hoc network systems, and there have been numerous papers in regards to them. However, often these requirements are addressed separately. For a valid solution, these requirements must be considered from an integrated view. In this paper, taking into account mobility and usability, we implement a framework which allows to securely share resources and services between devices in Ad-hoc networks, based on security policies defined by ...

7. **Simplifying PKI usage through a client-server architecture and dynamic p certificate paths and repository addresses**
Hunter, B.;
Database and Expert Systems Applications, 2002. Proceedings. 13th Internati
2-6 Sept. 2002 Page(s):505 - 510
AbstractPlus | Full Text: PDF(264 KB) IEEE CNF
Rights and Permissions

8. **A flexible scheme for on-line public-key certificate status updating and v**
Faldella, E.; Prandini, M.;
Computers and Communications, 2002. Proceedings. ISCC 2002. Seventh Int Symposium on
1-4 July 2002 Page(s):891 - 898
Digital Object Identifier 10.1109/ISCC.2002.1021778
AbstractPlus | Full Text: PDF(461 KB) IEEE CNF
Rights and Permissions

9. **IEEE Standard for Information technology- Telecommunications and info exchange between systems- Local and metropolitan area networks- Spec requirements Part 11: Wireless LAN Medium Access Control (MAC) and F (PHY) specifications Amendment 6: Medium Access Control (MAC) Secu Enhancements**
2004 Page(s):0_1 - 175
AbstractPlus | Full Text: PDF(2342 KB) IEEE STD

10. **IEEE Standard for Local and metropolitan area networks Part 16: Air Inte and Mobile Broadband Wireless Access Systems Amendment 2: Physica Access Control Layers for Combined Fixed and Mobile Operation in Lice Corrigendum 1**
2006 Page(s):0_1 - 822
AbstractPlus | Full Text: PDF(5468 KB) IEEE STD

11. **Performance analysis of scalable certificate revocation schemes for ad h**
Eichler, S.; Muller-Rathgeber, B.;
Local Computer Networks, 2005. 30th Anniversary. The IEEE Conference on
15-17 Nov. 2005 Page(s):9 pp.
Digital Object Identifier 10.1109/LCN.2005.105
AbstractPlus | Full Text: PDF(288 KB) IEEE CNF
Rights and Permissions

12. **A performance study of over-issuing delta-CRLs with distribution points**
Rojanapasakorn, A.; Sathitwiriyawong, C.;
Advanced Information Networking and Applications, 2004. AINA 2004. 18th In Conference on
Volume 2, 2004 Page(s):178 - 181 Vol.2

Digital Object Identifier 10.1109/AINA.2004.1283781

AbstractPlus | Full Text: PDF(253 KB) IEEE CNF
Rights and Permissions

13. **Caching alternatives for a MANET-oriented OCSP scheme**
Marias, G.F.; Papapanagiotou, K.; Georgiadis, P.;
Security and Privacy for Emerging Areas in Communication Networks, 2005. V
1st International Conference on
5-9 Sept. 2005 Page(s):209 - 217
Digital Object Identifier 10.1109/SECCMW.2005.1588315

AbstractPlus | Full Text: PDF(156 KB) IEEE CNF
Rights and Permissions

14. **FlexiCert: merging X.509 identity certificates and attribute certificates**
Lakshminarayanan, A.; Jianying Zhou;
Database and Expert Systems Applications, 2003. Proceedings. 14th Internati
1-5 Sept. 2003 Page(s):489 - 493
Digital Object Identifier 10.1109/DEXA.2003.1232071

AbstractPlus | Full Text: PDF(229 KB) IEEE CNF
Rights and Permissions

15. **Security aspects in standard certificate revocation mechanisms: a case s**
Berbecaru, D.; Lioy, A.; Marian, M.;
Computers and Communications, 2002. Proceedings. ISCC 2002. Seventh Int
Symposium on
1-4 July 2002 Page(s):484 - 489
Digital Object Identifier 10.1109/ISCC.2002.1021719

AbstractPlus | Full Text: PDF(257 KB) IEEE CNF
Rights and Permissions

16. **Using virtual organizations membership system with EDG's grid security access**
Niinimaki, M.; White, J.; de Cerff, W.S.; Hahkala, J.; Niemi, T.; Pitkanen, M.;
Database and Expert Systems Applications, 2004. Proceedings. 15th Internati
30 Aug.-3 Sept. 2004 Page(s):517 - 522
Digital Object Identifier 10.1109/DEXA.2004.1333527

AbstractPlus | Full Text: PDF(355 KB) IEEE CNF
Rights and Permissions

17. **Active certificates: a new paradigm in digital certificate management**
Mukkamala, R.; Balusani, S.;
Parallel Processing Workshops, 2002. Proceedings. International Conference
18-21 Aug. 2002 Page(s):30 - 37
Digital Object Identifier 10.1109/ICPPW.2002.1039709

AbstractPlus | Full Text: PDF(398 KB) IEEE CNF
Rights and Permissions

18. **Information technology- Telecommunications and information exchange systems- Local and metropolitan area networks- Specific requirements- I LAN Medium Access Control (MAC) and Physical Layer (PHY) Specificati**
2003 Page(s):i - 513

AbstractPlus | Full Text: PDF(6325 KB) IEEE STD

19. **Evaluation of certificate revocation policies: OCSP vs. Overissued-CRL**
Munoz, J.L.; Forne, J.; Castro, J.C.;
Database and Expert Systems Applications, 2002. Proceedings. 13th Internati
2-6 Sept. 2002 Page(s):511 - 515

AbstractPlus | Full Text: PDF(741 KB) IEEE CNF

Rights and Permissions

20. **Self-managed heterogeneous certification in mobile ad hoc networks**
Weihong Wang; Ying Zhu; Baochun Li;
Vehicular Technology Conference, 2003. VTC 2003-Fall. 2003 IEEE 58th
Volume 3, 6-9 Oct. 2003 Page(s):2137 - 2141 Vol.3
Digital Object Identifier 10.1109/VETECF.2003.1285402
AbstractPlus | Full Text: PDF(251 KB) IEEE CNF
Rights and Permissions

21. **A Study on Establishment of Secure RFID Network Using DNS Security E**
YoungHwan Ham; NaeSoo Kim; CheolSig Pyo; JinWook Chung;
Communications, 2005 Asia-Pacific Conference on
03-05 Oct. 2005 Page(s):525 - 529
AbstractPlus | Full Text: PDF(336 KB) IEEE CNF
Rights and Permissions

22. **IEEE Std 802.11-1997 Information Technology- telecommunications And exchange Between Systems-Local And Metropolitan Area Networks-spec Requirements-part 11: Wireless Lan Medium Access Control (MAC) And I (PHY) Specifications**
18 November 1997 Page(s):i - 445
AbstractPlus | Full Text: PDF(25764 KB) IEEE STD

23. **A simulation study of over-issuing delta-CRLs with distribution points**
Rojanapasakorn, A.; Sathitwiriyawong, C.;
TENCON 2004. 2004 IEEE Region 10 Conference
Volume B, 21-24 Nov. 2004 Page(s):21 - 24 Vol. 2
Digital Object Identifier 10.1109/TENCON.2004.1414521
AbstractPlus | Full Text: PDF(1860 KB) IEEE CNF
Rights and Permissions

24. **On certificate-based security protocols for wireless mobile communicati**
Chang-Seop Park;
Network, IEEE
Volume 11, Issue 5, Sept.-Oct. 1997 Page(s):50 - 55
Digital Object Identifier 10.1109/65.620522
AbstractPlus | Full Text: PDF(1492 KB) IEEE JNL
Rights and Permissions

25. **Restricting access with certificate attributes in multiple root environment certificate masquerading**
Hayes, J.M.;
Computer Security Applications Conference, 2001. ACSAC 2001. Proceedings
10-14 Dec. 2001 Page(s):386 - 390
AbstractPlus | Full Text: PDF(167 KB) IEEE CNF
